1 Part 1

I am working to collect data on family business creation. By this, I mean that I would like to access records of business ownership transfer. The records are government records and are public information. I have yet to find a suitable website for scraping or an API in which I can access this data yet. If such a suitable website is not found, I will proceed to scrap LinkedIn for anyone with the key word "Professional Referee" on their profile.

2 Assignments in R

2.1 JSON Files Part 1

The answer to question 5 part d is that the data are characters.

2.2 Sparklyr Part 2

I was unable to get spark and sparklyr to compute successfully.
